

TODDY COLD WATER DRIP INSTRUCTIONS

1. After removing your Toddy from the box, rinse plastic and glass containers.
2. Turn the plastic container over and put the rubber stopper in the bottom hole.
3. Wet the circular filter and place in the bottom of the plastic container.
4. Fill the plastic container with 8 – 9 cups of water when using a pound of coffee. (8 cups recommended for those who prefer stronger coffee)
4 ½ cups of water is recommended when using ½ pound of coffee.
5. ***Sprinkle*** your coffee on the water. ***Don't*** stir or touch the grinds.
6. Cover the top of the plastic container with a paper towel (even if your ground coffee is mounded higher than the sides of the plastic container).
Don't stir the grinds.
7. Let the container sit for 12 hrs.
8. Lift the plastic container over the glass carafe and pull the rubber stopper out allowing the coffee concentrate stream to drain into the glass carafe.
9. Set the plastic container on top of the glass carafe and wait for the concentrate to drain. Filtration typically takes 15 – 30 minutes to complete.
10. You are ready to go! Store the concentrate in the refrigerator. It will stay fresh for about 3 weeks.

CLEAN UP: Dispose of grounds. Take out REUSABLE filter and rinse thoroughly. Place it in a plastic bag while still wet and store it in refrigerator. The filter will last 3 to 4 months or up to 6 uses. The brewing container and decanter can be washed in the dishwasher or by hand.
